Minimize to Button feature, Automatic positioning, Key remapping, and other special features allow compatibility & easy to implement solutions Secure Network Logon options enable complete operation from pointing device Advanced Settings give power users additional features & control options Developer's Kit is included, and provides a wealth of integration code & examples

Powerful Software!

Works with any Mouse, Trackball, or traditional pointing device. Including Touchscreens, Light Pens, Pens, Wands, Tablet PC's, Touchpads, or any other Windows compatible pointing device.

Software Requirements

Unlimited Macro Panels

Unlimited Macro Panels can be created for any task, providing flexibility and ease of use. A single Click can replace hundreds of keystrokes, allowing users to replace repetitive tasks, and complete complex functions with a single action. The Visual aspect of My-T-Soft macros make them intuitive to new users and advanced users alike. Macros can even launch applications, or automatically open when you open your favorite application.

Microsoft Windows Compatible

My-T-Soft interfaces within the Windows environment seamlessly, allowing any pointing device to eliminate the need for a physical keyboard! Any Mouse, Pen, Tablet, Touchscreen, or other pointing device can take advantage of the My-T-Soft On-Screen Keyboards and panels in all graphic modes & hardware configurations.

Innovative User Software Solution for ALL Pointing Devices

The Keyboard panel supports over 65 countries and all graphic modes & hardware configurations. Can be used with any pointing device and or any Windows compatible pointing device. Supports Terminal Server applications, or automatically open when you launch applications, or automatically open when you open your favorite application.

More International Layouts

Network Logon Module

Infinite sizing & 3D Keys

Advanced Features

My-T-Soft includes features such as the Network Logon Module and a password protected Supervisor / Operator mode to secure configurations. The Virtual Keyboard Interface allows complete operation within the Windows environment from any pointing device!
